

**Pre Order Form**

*Two DVD products of Flash format tutorial movies  
From Warren Keller*

**Image Processing for Astrophotography**  
**High-Quality Scripted Tutorials - No wasted time**  
 No excessively long, off the cuff presentations as with some videos. IP4AP's tutorials are carefully scripted to get to the point in 5-minutes! We pride ourselves on thorough research and professional production.

**New Series - Soup2Nuts**  
 For the first time, Warren walks you through Preprocessing, and catches you up to the workspace of Photoshop CS4 and 5, filling in the gap between the latest versions and where the prior series left off in CS2.

**S2N Part-1**  
 Covered are the brand new Astroart 5.0, Photoshop CS5, and MaxIm DL 5. Twenty-four tutorials in all.

**S2N Part-2**  
 Look for Part-2 covering Object-Specific Processing and Advanced Techniques with included files in the near future.
